

TO: Honorable Mayor and City Council

FROM: City Administrator Ron Johnson

SUBJECT: Request to Use Plastic Pipe for Water Main

MEETING DATE: October 17, 2017

BACKGROUND

At the last Council meeting you received a verbal request from Babe O’Gorman to use plastic instead of ductile iron for the water main to be installed in his housing development project next spring. He followed up with a written request.

The city installed plastic water main in an earlier project, and staff is ok with the use of plastic pipe within this project.

Mr. O’Gorman will need to provide engineered plans for review and approval prior to construction, but that is a moot point as to the question on the table.

REQUESTED COUNCIL ACTION

Approve a motion allowing the use of plastic pipe for water main in the O’Gorman housing project.
