

TO: Mayor and City Council

FROM: Dan Howard, Public Works Director

SUBJECT: Landscaping

MEETING DATE: Tuesday, May 18, 2021

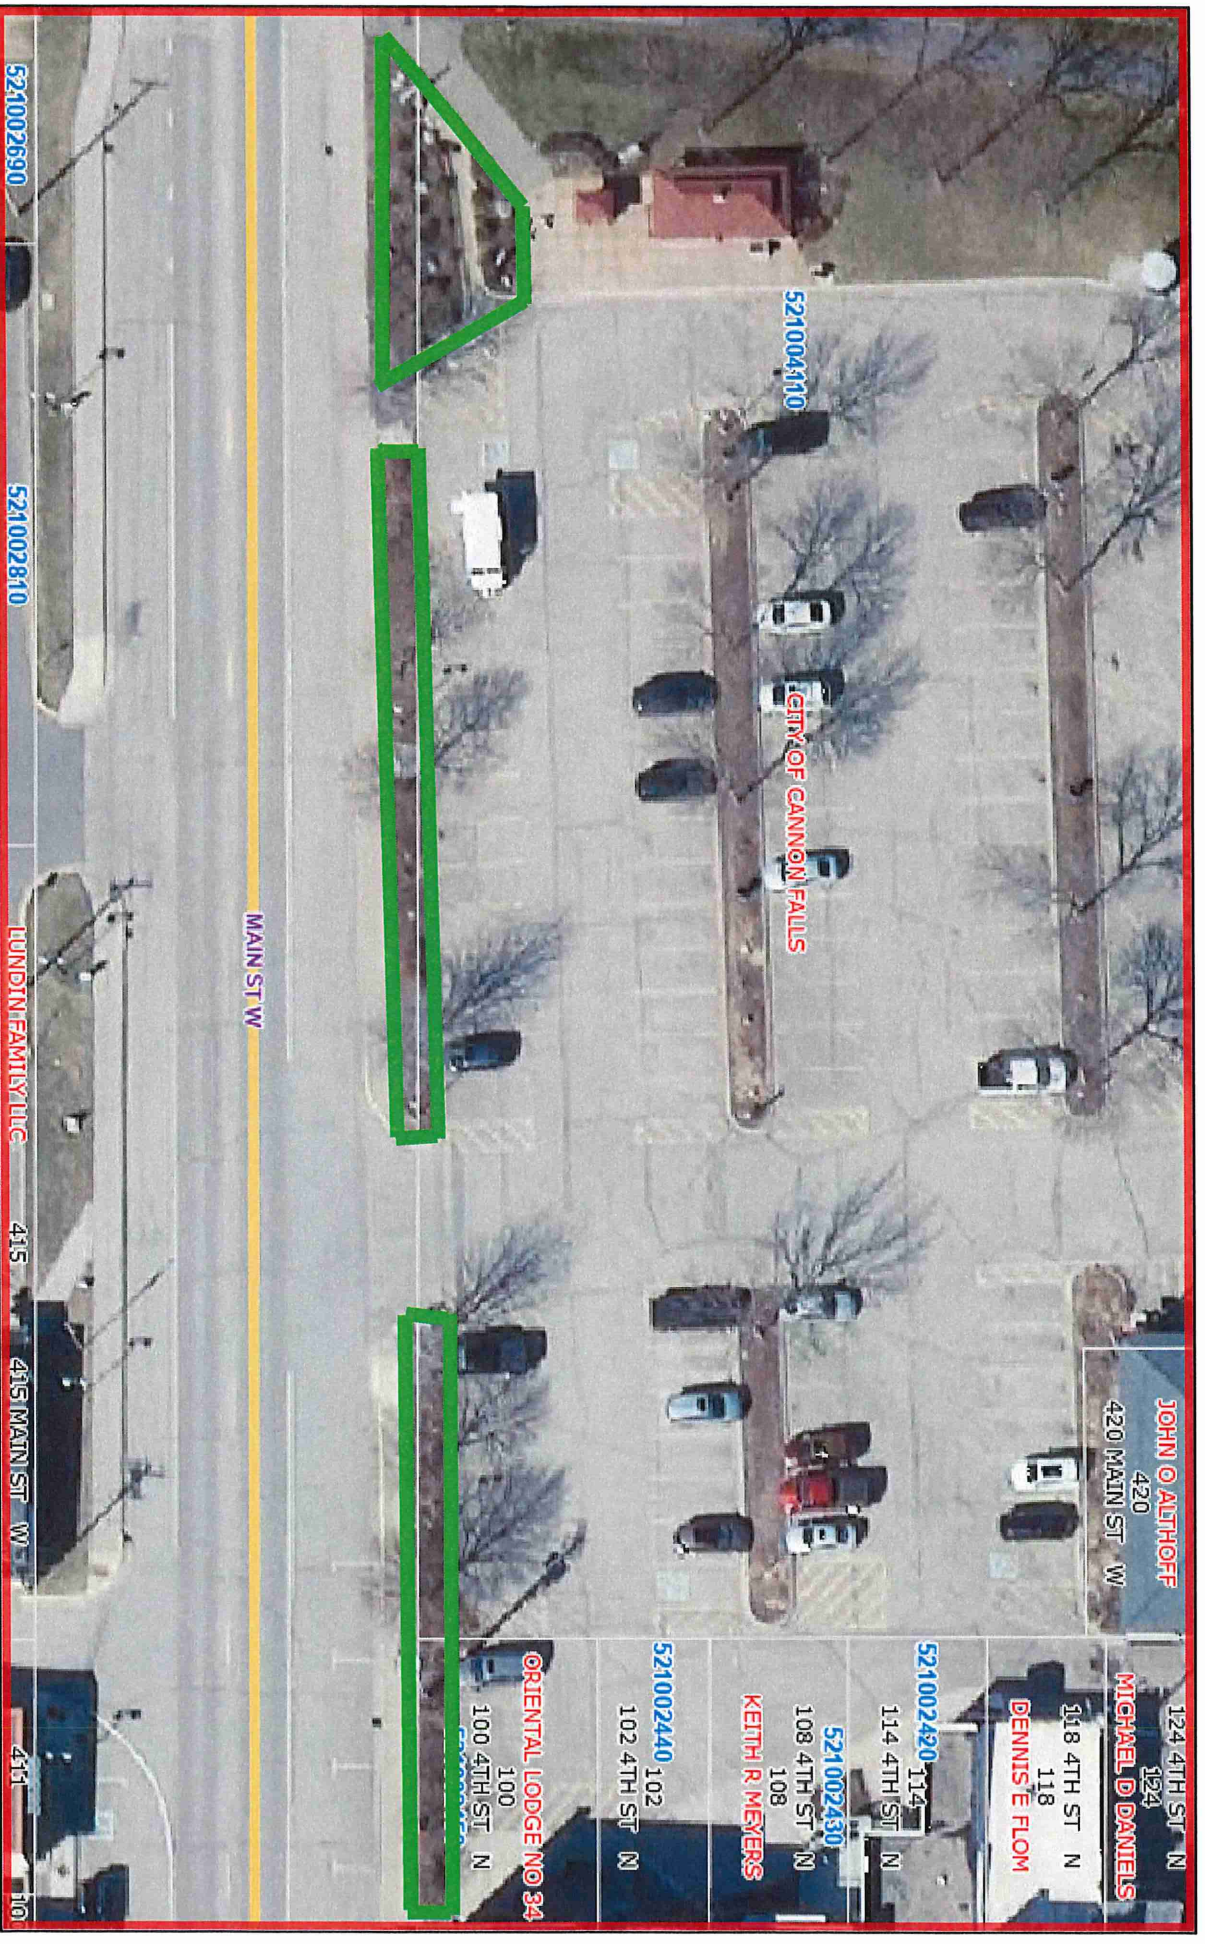

BACKGROUND

Public Works has been landscaping the island areas of the Cannon Falls City Parking Lot. We would like to landscape the 3 southern most islands at this time. This would involve minor excavation of the existing landscaping fill, installation of new landscaping fabric, and then adding new mulch that would match the other island areas of the City Parking Lot. No tree removal will occur. No shrubs will be added. Estimated costs would be: Rental of the mini excavator locally at \$260, landscaping fabric at \$550, and mulch purchase of \$2,000. Total estimated cost of the project is \$2,810. Sale prices may result in a lower cost for mulch.

REQUESTED COUNCIL ACTION

I respectfully request a motion and approval to move forward with this phase of the landscaping project at an estimated cost of \$2,810 as recommended by the Public Works Commission.
