

TO: Mayor and City Council

FROM: Dan Howard, Public Works Director

SUBJECT: WHKS feasibility report to extend City Water and Sewer

MEETING DATE: Tuesday, August 17, 2021

BACKGROUND

At the August 10, 2021 Public Works Commission meeting, Katie Weidner spoke on behalf of her Mother, Carolee Stock, who owns the property at 1014 River Road and inquired about connecting to City water and sewer. Public Works is requesting permission to authorize WHKS Engineering to prepare a feasibility report to extend City Water and Sewer service to 1010, 1014 and 1106 River Road. The owner of 1014 River Road is unable to sell the property as their septic system is non-compliant. 1010 and 1014 River Road also share a private well. The feasibility report would include the cost of extending the Water and Sewer service to the area as well as the estimated cost to the affected residents.

REQUESTED COUNCIL ACTION

Motion and approval to authorize WHKS Engineering to prepare an engineer's feasibility report to extend City Water and Sewer to 1010, 1014 and 1106 River Road as recommended by the Public Works Commission.
