

TO: CABLE COMMISSION

FROM: JON RADERMACHER City Administrator
SAM SINGH CFTV PEG Access Coordinator

SUBJECT: TRICASTER REPLACEMENT

MEETING DATE: August 8, 2025

BACKGROUND;

The Cannon Falls Community Television Tricaster system ("TC-1") has been experiencing issues. The Tricaster system is used for live streaming; broadcasts, Zoom, as well as additional redundant recording in the event it's not being recorded on the main TightRope Media system server, YouTube, or camera. Although it was sent out for a refurbishment last year, it is starting to experience issues once again. Considering its age (over ten years) instead of doing another refurbishment, we are requesting a brand new replacement in order to ensure its ability to serve its purpose for the community and the City properly. AVS Systems will be providing the new system along with assisting with the install. Additionally we are looking to add a support plan to the new system in order to avoid future problems as such in the future. The expected installation of the new Tricaster will take one day. A quote was received from AVS System for the replacement equipment, installation and service coverage, and staff were able to find comparable pricing through other vendors and AVS was comparable and less expensive.

STAFF RECOMMENDATION

Replace the tricaster through AVS Systems for parts, installation and maintenance.

REQUESTED COMMISSION ACTION

Cannon Falls Cable Television is requesting the Cable Commission recommend to the City Council purchase of the tricaster for the amount of \$26,250.00 along with the ProTek Prime coverage of \$795/year for future support.
